

DEBRIEFING SHEET

WORK HABITS

SUMMARY OF PROJECT

Thank you for taking part in this study. Unfortunately, the exact purpose of the study could not have been revealed to you upfront as it might have impacted your answers to the questionnaires. The true purpose of the study is to investigate the relationship between LinkedIn usage and feelings of impostor phenomenon (sometimes referred to as impostor syndrome). With the spread of online job platforms, such as LinkedIn, opportunities to compare yourself to others in the work sphere are always available at your fingertips. Since on these platforms users are trying to portray themselves as positively as possible these comparisons often lead you to feel worse about yourself. Therefore, we believe there could be a link between LinkedIn usage and feelings of impostor phenomenon. We are investigating this through questionnaires on LinkedIn usage, social comparison and the impostor phenomenon.

FURTHER GUIDANCE

In case participation in this study has evoked any uncomfortable feelings for you feel free to contact the following support services:

[Samaritans](#) – available 24/7 all days of the year you can contact them through phone, email or post to talk about anything that is upsetting you

[Shout](#) – a confidential and free 24/7 text service offering support for mental health struggles

KEEPING IN TOUCH

Your data will now be stored using the anonymous code you have generated as part of the study. You have the right to withdraw your data from the study until 31/03/2021 by which time your data will be analysed and written up. If you want to withdraw your data at any point until then please contact the lead researcher at r.privoznikova@lse.ac.uk and include your anonymous code in the email.

ANY MORE QUESTIONS?

If you have any further questions, please contact the researcher(s) using the details below.

Rebeka Prívozníková – undergraduate student and lead researcher: r.privoznikova@lse.ac.uk

Deema Awad – research supervisor: d.awad@lse.ac.uk

If you are unhappy at any point in the study, or if there is a problem, please contact the LSE Research Ethics Committee: research.ethics@lse.ac.uk
